

AirCheckReady

MULTI-CHANNEL AUTOMATION

24/7 RECORDING FOR AIRCHECKS & LOGGING

Why spend hundreds per radio station when AirCheckReady can skim & log ALL your stations on one computer!

Works with any sound cards, from Soundblasters to AudioScience to Lynx & other multi-channel cards

Have 8 or more record schedules running on the same computer

Only limited by the number or type of audio recording devices you have installed on your computer

Play files even if they are actively being recorded - perfect for monitoring!

Segment record everytime someone opens their mic

PRICING

Available in a single channel or multi-channel version

Single channel version only \$295

Multi channel version only \$795

Turnkey setup + training + 1st year of support only \$250

POWERFUL & FLEXIBLE AUTOMATED RECORDING
Automatically record 24/7 and store in WAV & compressed formats on your drive, network or removable drive devices or your web site

AirCheckReady is our famous ControlReady system, with the play commands locked out. Performs any time or logic based programming routines with the same powerful programming & confirmation reporting abilities as our full automation system

Here are a few of the powerful features also included in AirCheckReady

- Record multiple shows at the same time
- Full support for Broadcast Tools and compatible switchers and GPI logic
- WAV compatible - no need to convert or compress files
- Power loss protection - resumes operation if restart ever occurs
- Buy as software only or order a turnkey system complete
- Start programs while they are STILL recording
- Free cut labeller you can give ALL your friends and providers
- Auto-syncs files across LAN from production or FTP servers
