

# PodcastReady

**No Technical Mumbo Jumbo**  
No one else makes it this easy to put audio on your website(s). No knowledge of HTML, XML/RSS, FTP, PHP, etc needed.

Only limited by the number or type of audio recording devices you have installed on your computer

Works with any sound cards, from Soundblasters to AudioScience to Lynx & other multi-channel cards

**PodcastReady does all this:**  
Automatic Recording,  
Multi-channel Recording,  
Multi-Studio Recording,  
Audio Recording Schedules,  
Time-Based Audio Recording,  
Trigger-based Audio Recording & Remote Button Panel Triggered Recording

## PRICING

Available in a single channel or multi-channel version

Single channel version only \$495

Multi channel version only \$1,495

Turnkey setup + training + 1st year of support only \$250

AUTORECORD PROGRAMS & PODCAST THEM AUTOMATICALLY

## POWERFUL & FLEXIBLE AUTOMATED RECORDING

**No matter how you originate your audio programs, PodCastReady can automatically record, convert, compress & paste together entire playlists of files and then web publish your podcasts - complete with RSS feeds to one or more web sites. Record and podcast existing shows, or schedule files you already have in-house to be sent to your web site automatically.**

Here are a few of the powerful features of PodcastReady

- Schedule all your recordings on a 24/7 basis
- Record more than 1 thing at a time
- Record based on time or GPI triggers
- Automatically compress WAV recordings to MP3
- Automatically FTP converted files to your web site
- Automatically update RSS/XML feed files
- Automatically schedule the SPLICING of multiple audio files (segments, commercials, etc.) into one file
- Static & dynamic file naming (overwrite specific filenames and/or form names with replaceable parameters, day, date, hour, etc)
- Runs on dedicated Windows PC / Works with all automation systems
